

Urban Patterns:

Rank Size Rule and Economic Base of Settlements

PP. 410-412 and 416-420

Rank Size Distribution of Settlements:

In MDCs, the pattern of cities follows the rank-size rule. This states that:

If the largest city in a country is more than twice the size of the second city, it is said to be what?

The existence of the Rank Size Rule in a country tells us what about the country?

Conversely, the absence of the rule tells us what about the country?

● **HIERARCHY OF BUSINESS SERVICES**

Read this section and answer the questions in the graphic below.

1 WORLD CITIES	a. List the three largest world cities.	b. What do they share?	c. List the “second tier” of world cities.
2 REGIONAL COMMAND & CONTROL CENTERS	d. What services do these cities contain?	e. Give several examples cities.	
3 SPECIALIZED PRODUCER-SERVICES CENTERS	f. Give examples of specializations and cities represented by each.		
4 DEPENDENT CENTERS	g. List the four sub-types of dependent centers and an example city for each.

What are examples of “back-office” functions?

-
-
-
-

In the boxes below, describe the change in back office work over time.

1. Describe where it took place
2. Explain why it took place where it did or why it moved.

The diagram consists of three empty rounded rectangular boxes arranged horizontally. They are connected by a light blue horizontal bar that runs through the center of each box. The rightmost box has a light blue arrow pointing to the right, indicating a sequence or flow of information.

Explain how Richard Florida (author of the Spiky article) measured the talent and coolness of a city.

Does Charlotte rank highly on either index?
